

Project ECHO Paediatric Palliative Care (PPC)

Project ECHO PCC will connect experts in pediatric palliative care with health care workers caring for children with life-limiting conditions across South Asia, and provide practical training using web-based videoconferencing.

People need access to specialty care for complex conditions

Not enough specialists to treat everyone, especially in rural India

ECHO® trains primary care clinicians to provide specialty care services

Patients get the right care, in the right place, at the right time.

Who can participate?

All levels of providers including:

- Physicians
- Nurses
- Allied health-care providers (including pharmacists, psychologists, social workers, occupational therapists, physiotherapists, play specialists, and others).

What are the benefits?

- Receive mentorship from pediatric palliative care specialists
- Collaborate with others through case-based learning
- Become a local specialist in your community

What are the technical requirements?

- You will need a laptop or hand-held mobile device. Project ECHO uses a cloud-based videoconferencing system called Zoom which runs on both high and low speed internet connections, enabling access for providers in remote locations. You can also dial in from any telephone.

How do I join?

Register by completing the registration form <https://www.surveymonkey.com/r/P7G3WLN>
Contact Ms. Vineela Rapelli if you have any questions: vineela.rapelli@gmail.com

When will sessions take place?

Sessions will take place **once every two weeks**, on Tuesdays from 2:00-3:30pm (Indian Standard Time). The first session will start March 6, 2018.
